

NICOLINI AIR LOGISTIC - Security Policy

NICOLINI AIR LOGISTIC S.r.l. is an efficient, effective, and safe transport company. We optimize transport logistics, we are punctual and we invest in the protection of the assets of our customers.

To give greater evidence of our approach and our processes, our infrastructures comply with organizational and infrastructural standards that represent the best practices in the sector. For the security of the supply chain, Nicolini Air Logistic s.r.l. has adapted its fleet and organization to the requirements of the TAPA TSR standard (Trucking Security Requirements) Liv. 1.

This means overseeing all organizational phases starting from selection and staff training, control of loading and unloading operations, analysis of risks on planned routes, to the definition of behavioral rules for personnel traveling, up to the management of emergencies.

A structured system for supply chain security management allows us to:

- increase the safety level of cargo transport operations;
- raise the level of protection for managing high-value or high-value products risk;
- prevent theft and loss;
- increase the satisfaction and trust of the customers.

This Security Policy is represented to all the stakeholders of Nicolini Air Logistic to share even more operational aspects in order to obtain "participatory" safety to which of all the players involved in the transport and logistics processes can benefit from. In this sense Nicolini Air Logistic s.r.l. will maintain a constant communication relationship, either under standard operating conditions and for possible or actual emergencies that will be communicated to our customers within 24 hours of viewing.
